

Small Remote Displays D320

D320 Specifications

Key Highlights & Features

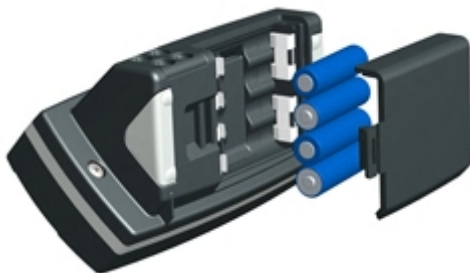

Product Description

- Bright LED Backlighting
- 20mm LCD display
- Tough, compact ABS housing
- Auto-detecting setup
- Cross manufacturer compatibility
- C-Tick, CE and FCC approved

The D320 is a compact six digit remote display making it a cost effective display solution for a variety of applications; including freight / airport scales, and mobile feedlot mixers. The flexible mounting options (panel, desk, and wall) allow for fitting into these installations and the LCD display is LED backlit catering for a range of lighting conditions.

The setup is auto-detecting to selected indicators and the unit has an RS-232 serial input. The unit's software is run from flash memory and can be upgraded in the field using the rin-link connection. The standard power input is 12-24VDC, but the D320 can be operated from optional 4 x AA batteries that can be fitted into the optional desk stand housing.

Smart Weighing

Desk Mount with Battery

M3001 Desk Mount accessory is an ABS desk stand with non-slip rubber feet which holds 4xAA batteries.

Small Remote Displays D323

Stainless Steel Remote Display
